

## My Editor Config

I use Visual Studio Code (<https://code.visualstudio.com/>) as an editor/IDE in this course.

To achieve the look and feel as shown in the videos, I switched the theme to the “Dark+” theme and installed the Vetur extension (<https://github.com/vuejs/vetur>)

Alternatives would be:

- Webstorm by JetBrains (<https://www.jetbrains.com/webstorm/>)
- Atom (<https://atom.io/>)
- Sublime Text (<https://www.sublimetext.com/>)
